

Dear Appliance Installer:

RE: ACCOR products

To Whom It May Concern,

It has been brought to our attention that you may have received incorrect and, possibly misleading, information regarding ACCOR products. Please be advised that the information you may have received was erroneous. You can be assured that ACCOR products are of superior quality and are industry leaders of their product category.

ACCOR Technology, Inc. is a US manufacturer established in 1988. ACCOR has manufactured and distributed supply stop valves for faucets, toilets, dishwashers, ice maker boxes and washing machine boxes to millions of homes nationwide. Approximately 40 million ACCOR valves have been installed over 30 years, and ACCOR products go into an estimated 30% of all new housing in the USA.

ACCOR products are manufactured in accordance with ASME A112.18.1 and are lead free and certified by NSF 61/9 toxicity requirements for potable water. ACCOR valves carry all major code listings including IAPMO (Uniform Plumbing Code) and the International Plumbing Code. ACCOR valves are made in USA and carry a 10 year warranty, the strongest in the industry.

ACCOR uses superior quality advanced polymers, **same as or similar to the polymer threads on the appliance that connect to a metal nut on the flexible connector**, and are non-corrosive and lead free. ACCOR products are some of the most innovative, technologically advanced fixture fittings in the industry. More in-depth product and warranty information can also be found at our web site: [www.accortechnology.com](http://www.accortechnology.com)

If you have any concerns or questions about Accor's products, please contact us directly.

Sincerely,

A handwritten signature in black ink that reads "Jerry E. O'Neill".
